

Selective laser sintered d-tc housings with dynamically charged dielectric material and active tesla coil inside

D-level housing with DGC* technology inside

Highly flexible DIHC* technology wire with heavy duty black sleeving

HELLO MUSIC

d-tc - the new flagship line of products from Anszu Acoustics. The series consist of a full cable loom and a range of mechanical decoupling devices.

The Anszu **d-tc** cables has been created using all the know-how gathered from our work with a diversity of High-End products in recent years. We continue to utilize the Anszu technologies DGC (Direct Ground Connector Technology), DIHC (Double Inverted Helix Coil technology) and NSC (Noise Suppressing Coil technology) - and on top of that we have added further groundbreaking technologies such as dynamically charged dieletrikum and the active Tesla Coil in the new unique Anszu **d-tc** cable concept.

The performance is stellar. There is simply less filter between you and the music. The micro details are simply better preserved and presented to you in a natural way that leaves you stunned that a cable can have such a stunning influence on the performance of your system.
