

MP 8

Don't underestimate the little ones

Despite its diminutive size, the MP 8 Multi Source Player delivers a big performance combined with a wealth of features. Based on our award-winning R-series MP 2000 R MKII, the MP 8 ranks as a digital multi-talent, incorporating a CD mechanism, high-resolution streaming client, DAB/FM tuner and Bluetooth module. The MP 8 completes our Series 8 range to form a complete High-End system that incorporates all the features of our large systems: a great amplifier, our finest DAC and our very latest Multi Source player. It might be small but as audiophile systems go, we think it is perfectly formed.
